PROFESSIONAL EXPERIENCE

Oatmeal AI | Remote **August 2026 – Present**

AI Engineer

- Architected a stateful production platform with **Python, FastAPI, and LangGraph**, routing requests across workflows.
- Engineered **Redis and Firestore** persistence to preserve multi-turn state and recover conversations across horizontally scaled instances.
- Reduced **LLM inference** costs by 40% through context pruning, retrieval grounding, and structured inter agent communication while improving response consistency.
- Refactored synchronous **Flask** routes into asynchronous **FastAPI** endpoints, reducing request blocking and enabling Server Sent Events streaming.
- Deployed asynchronous **AI services** to **Azure** Container Apps with 99.5% uptime using Celery queues and real time streaming.

Berkshire Hathaway | San Jose, CA **August 2025 – July 2026**

Software Engineer, AI/ML Systems

- Developed secure **RESTful APIs** connecting production ML services with a customer facing homeowner application for real time inference delivery.
- Architected an **LLM agnostic** evaluation **pipeline** spanning Azure OpenAI, Amazon Bedrock, Anthropic, and Gemini for reliability and cost comparison.
- Productionized a real-time sign-language system using **TensorFlow sequence models**, improving accuracy by 18% and reducing inference latency by 31%.
- Optimized **Oracle** indexes and query paths, improving data retrieval performance by 35% for application and ML workloads.
- Stabilized Transformer and **CNN** inference on GCP hosted GPUs using temporal buffering to balance latency and consistency

California State University, East Bay | Hayward, CA **September 2024 – May 2026**

Software Engineer, AI/ML Research

- Built Python integrations with **Workday APIs**, replacing 24 hour student record batches with updates in under 5 minutes.
- Integrated ServiceNow webhooks with **Okta** to automate zero touch password resets, deflecting approximately 150 support tickets per month.
- Engineered a Teacher **AI Agent** with **RAG**, ChromaDB, and multi agent workflows across 60+ curriculum units.

Accenture | Pune, India **January 2022 – June 2024**

Software Engineer (Backend)

- Decomposed a legacy banking monolith into **Java Spring Boot microservices** and built secured APIs handling millions of daily transactions.
- Provisioned **AWS** infrastructure with Terraform and orchestrated Amazon EKS deployments for production backend services.
- Architected a high throughput validation service using **Go and gRPC**, reducing interservice latency by 50%.
- Optimized IBM Db2 queries processing 10,000 transactions per second, reducing **P99 latency** from 450ms to 290ms through indexing and query plan analysis.
- Engineered **Kafka** based onboarding services with distributed state aggregation and asynchronous verification workflows for a 2M+ customer platform.
- Extended **Jenkins** and **Terraform** pipelines with automated testing and rolling deployments, reducing release lead time from two days to four hours.

SELECTED SOFTWARE PROJECTS | GitHub

Distributed MCP Server | Python, AsyncIO, Redis, Redlock

- Built a non blocking **server** with **connection pooling** and distributed locking for safe concurrent request handling.
- Integrated Llama and LangChain for Jira and Confluence automation, achieving 95% accuracy, reducing token usage by 60%

Concurrent Vector-Ingestion Pipeline | Rust, Rayon, Serde, JSONL

- Parallelized document processing across CPU cores, achieving **73.9% lower latency and 3.88× throughput** over the sequential benchmark, applying Rust ownership and borrowing with bounded JSONL streaming

Smart Calorie Counter | Flask, PostgreSQL, Redis, AWS EKS

- Implemented Redis caching to reduce external API calls by 70% while maintaining response times under 300ms.

SKILLS & INTERESTS

Java | Python | Go | Rust | SQL | Spring Boot | FastAPI | React | Flask | TypeScript | Node.js | REST APIs | gRPC | Microservices | Distributed Systems | Event-Driven Architecture | PostgreSQL | IBM Db2 | Redis | MongoDB | Kafka | Kinesis | Spark | Airflow | Redshift | AWS | Azure | Docker | Kubernetes | EKS | Helm | Terraform | Jenkins | ArgoCD | Ansible | Prometheus | Grafana | Splunk | AI | LLM | ML | MLOps | OAuth 2.0 | JWT | RBAC | CI/CD

EDUCATION

Master of Science (M.S.) in Computer Science | California State University, East Bay | GPA: 3.8 **May 2026**

Bachelor of Engineering (B.E.) in Computer Engineering | Savitribai Phule Pune University **May 2021**

Certification: | AMD ROCm Certified Associate | Credential **August 2026**
